Professional Summary

AI educator and systems architect with experience designing and deploying AI-powered solutions and managing data-centric training programs. Proven ability to build LLM-based AI agents, lead client-facing delivery teams, and automate real-world workflows. Strong portfolio in NLP, Retrieval-Augmented Generation (RAG), agentic AI, and instructional strategy. Skilled at working independently, collaborating cross-functionally, and delivering high-quality results in fast-paced environments.

PROFESSIONAL EXPERIENCE

Instructor – Agentic AI

Quaid-i-Azam University | Feb 2026 – Present

- Delivering lectures on Agentic AI, intelligent agents, and LLM-powered autonomous systems to undergraduate students.
- Teaching practical implementation using LangChain, LangGraph, CrewAI, LlamaIndex, and Mesa (Agent-Based Modeling).
- Guiding students in developing multi-agent systems, retrieval-augmented generation (RAG) pipelines, and tool-integrated AI workflows.
- Evaluating student projects, presentations, and applied agentic system implementations.

Instructor – AI & Data Science

atomcamp | Jan 2024 – Present

- Delivered live, cohort-based instruction in AI, Data Science, and automation systems to 100+ learners per batch.
- Delivered Power BI training sessions to students and professionals, enabling them to build their own dashboards and insights.
- Delivered sessions on AI Fundamentals and Responsible AI to 600+ trainees during national AI initiatives, including Indus AI Week.
- Designed a one-day Agentic AI training program for faculty under the AI-Ready Faculty initiative in collaboration with the Higher Education Commission (HEC), Ministry of IT & Telecommunication (MoITT), and Meta.
- Delivered sessions on no-code AI tools to enhance teacher productivity as part of the national AI-Ready Faculty Training of Trainers (ToT) program.
- Delivered structured training in Machine Learning and Natural Language Processing (NLP) to MBA students at Karachi School of Business & Leadership (KSBL).
- Delivered international training sessions in Power BI, focusing on data modeling, dashboard development, and analytics reporting.
- Taught AI Bootcamp programs to 40+ O/A Level students, introducing prompt engineering and agentic AI concepts.
- Guided learners through hands-on projects integrating AI models, automation workflows, and analytics dashboards.

Director Learning – AI & Data Science Programs

atomcamp | Jan 2026 – Present

- Provide strategic leadership for AI & Data Science bootcamps, overseeing curriculum direction, instructional

standards, and learner outcomes.

- Drive program-level quality assurance and academic governance across cohorts.
- Lead cross-functional coordination between trainers, operations, and stakeholders to ensure consistent instructional excellence.
- Oversee evaluation frameworks, learner performance metrics, and continuous improvement initiatives.

Learning Manager – AI & Data Science Programs

atomcamp | Apr 2025 – Dec2025

- Lead all learning operations for AI & Data Science bootcamps, overseeing training design, instructional quality, and learner outcomes.
- Develop and implement evaluation strategies and evidence-based assessment methods to monitor and enhance learner progress.
- Supervise and optimize the effective utilization of Teaching Assistants (TAs) to support individualized learning and engagement.
- Enhance formative assessment practices and introduce structured audit processes to ensure training consistency and instructional quality.
- Improve feedback mechanisms to support timely, actionable insights for both learners and trainers.
- Design and execute data collection systems using formative tools, performance surveys, and learner feedback loops.
- Lead data-driven decision-making by standardizing evaluation indicators and using analytics to improve trainer performance, learner retention, and curriculum effectiveness.

Delivery Manager – Technical Bootcamps

atomcamp arabia | Feb 2025 – April 2025

EdTech Partners: atomcamp, Taival Valley, Elm – Madina, KSA | Onsite

- Led the successful delivery of three intensive, high-value bootcamps: Web Development, iOS Development, and Android Development (each 3 months long).
- Provided personalized training to a cohort of 25 selected students, ensuring tailored guidance and skill-building.
- Managed end-to-end operations including scheduling, trainer coordination, learner logistics, and stakeholder reporting.
- Acted as the central point of contact between local partners and instructional teams to maintain quality and cultural alignment.
- Delivered performance tracking, feedback loops, and real-time issue resolution to ensure timely outcomes across all programs.

Team Lead – Trainers & Teaching Assistants

atomcamp | Jan 2024 – January 2025

- Supervised a team of instructors and TAs across multiple bootcamp cohorts, ensuring instructional quality and learner support.
- Built onboarding frameworks, delivery playbooks, and QA processes to standardize training practices.
- Facilitated peer reviews, feedback sessions, and continuous improvement initiatives for instructional staff.

Freelance AI/NLP Engineer

Remote | 2023 – Present

- Designed RAG-based pipeline for automated medical report generation using OpenAI GPT-4 and vector search.
- Built an LLM-driven sentiment classification and topic modeling pipeline using RoBERTa and LDA for a cybersecurity client.
- Developed conversational agents for training simulations using LangChain and custom prompt flows.

- Delivered data insights and recommendations through visualizations and Python automation..

RESEARCH & PROJECT EXPERIENCE

Master's Thesis – Multimodal Retrieval-Augmented Generation for Medical Report Generation

- Developed a structured Retrieval-Augmented Generation (RAG) framework for automated radiology report generation.
- Designed an alignment model to extract clinically relevant biomarker phrases from medical images.
- Built a Knowledge Graph-based disease reasoning module using Graph Neural Networks (GNNs).
- Integrated structured retrieval with LLM-based generation to reduce hallucination and improve factual consistency.
- Incorporated explainability through graph-based reasoning path tracing.
- Evaluated performance using BLEU, ROUGE-L, CIDEr, CheXbert F1, and RadGraph F1 metrics.
- Conducted ablation studies comparing text-only RAG, multimodal RAG, and baseline image-to-text models.

Tools & Frameworks: Python, PyTorch, Transformers, GNNs, Knowledge Graphs, BioGPT, Radiology-BART

Sentiment and Topic Analysis of Antivirus Software Reviews

- Analyzed customer reviews of ~10 antivirus products using sentiment analysis, topic modeling, and aspect-based analysis.
- Applied NLP preprocessing techniques including tokenization, lemmatization, and stop-word removal.
- Used Twitter-RoBERTa for sentiment classification.
- Conducted LDA-based topic modeling and clustering to identify key themes and user concerns.
- Developed visualizations (bar charts, word clouds, heatmaps) to present actionable insights.
- Provided product improvement recommendations based on user feedback.

Tools: Python, NLTK, RoBERTa, TF-IDF, LDA, KMeans, Matplotlib, Seaborn

Analysing University and Course Ratings Using Business Analytics

- Conducted in-depth analysis of student satisfaction using ratings and feedback data from various UK universities.
- Built regression models and Random Forests to identify drivers of university and course satisfaction.
- Applied K-Means clustering to segment institutions based on satisfaction profiles.
- Performed NLP analysis (sentiment analysis, topic modeling using LDA) to interpret student comments.
- Conducted ANOVA and Chi-Square tests to assess demographic effects on satisfaction.
- Delivered strategic suggestions for improving student life, facilities, and course quality.

Tools: Python (Pandas, NumPy, Scikit-learn, TextBlob, NLTK), Matplotlib, Seaborn, Plotly

EDUCATION

Bachelor of Computer Science

University of Sahiwal, Sahiwal(3.51/4.00)

2017 – 2021

Master of Artificial Intelligence

Comsats, Islamabad(3.47/4.00)

2023 – 2025

SKILLS

- **Data Science & AI:** Python, Scikit-learn, NLTK, Transformers, Hugging Face, RoBERTa, LDA, Regression, Clustering

- **Data Analytics & BI:** Power BI, Pandas, NumPy, Matplotlib, Seaborn, Plotly, Dash
- **AI Technologies:** LLMs, Agentic AI, LangChain, LangGraph, AutoGen, Prompt Engineering, RAG, N8N,
- **Instructional Design:** Curriculum Development, Assessment Design, TA Management, Data-Driven Instruction
- **Project Delivery:** Cross-functional Team Leadership, Remote Coordination, Client Engagement, Bootcamp Management
